Wiha makes it possible: Optimum fitting for perfect work.

Screwdriver range

The Wiha Finish screwdriver concept.
The revolution in screwdriver design.

Wiha SoftFinish®.
The specialist for dry and general applications.
- Wiha SoftFinish® Scala
- Wiha SoftFinish® Stubby-Schraubendreher

Wiha MicroFinish.
The specialist for wet and oily applications.

Wiha Classic.
The robust screwdriver for multiple applications.

Wiha wooden handle.
The all-rounder for woodworking applications.

Wiha PicoFinish.
The comfortable precision screwdriver.

Wiha Universal scraper.
Easily removes sealing, paint and glue.

Wiha special tools.
- Universal scraper, trim pin remover
- Square reamer, awl,
- Small screwdrivers.
- Magnetisers.
- Screw extractor.

Wiha VDE screwdrivers.
For safety and quality.
- Wiha slim-Family
- Wiha slim Selection Set

Wiha SoftFinish® electric slimFix.
The safe and comfortable insulated VDE screwdriver.

Wiha SoftFinish® electric slimVario.
Maximum safety at minimum size.

Wiha SoftFinish® electric.
The safe and comfortable insulated VDE screwdriver.
- Wiha Xeno. For terminal screws.

Wiha Classic electric.

Single-pole voltage tester.

Wiha ESD screwdriver.
For use on electrostatically sensitive components.

Wiha SoftFinish® ESD.
Wiha SoftFinish® ESD screwdriver Stubby.

Wiha Precision ESD.
The static dissipative precision screwdriver.

Wiha Ceramic.
The non-static adjustment tool for clean rooms.
Introducing the next generation of screwdrivers from Wiha: the SoftFinish® and the MicroFinish, because functionality and ergonomic styling together make up the most important aspect of a screwdriver.

The generation of Wiha Finish handles with its total of four handle sizes was developed on the basis of extensive studies into handle ergonomics with the support of high-profile research institutes. The result is a completely ergonomic design and optimal handle lengths and diameters. The user is guaranteed a perfect hold with every handle size.

The feel good factor
Due to the combination of material and handle size, each Finish screwdriver fits perfectly into the palm of the hand. There is no strain on muscles, ligaments and joints, with the result that minimum force is required for maximum torque.

SoftFinish® or MicroFinish
Screwdrivers used in dry working environments have to have a different handle surface to those used in oily working environments. Wiha has taken this on board and has developed a Finish screwdriver for dry and general applications and one for oily applications.

The handle core of both models consists of impact-resistant, recyclable special plastic material. The torque strengthening Finish zone of the SoftFinish® version is made of a soft, thermoplastic elastomer and is ideal for dry and general applications.

The Finish zone of the MicroFinish version is made of impact-resistant cellulose acetate that is also resistant to oil and chemicals. Its micro-fine surface structure ensures convincing high-torque transmission without slipping, even with oily hands.
Wiha SoftFinish®

The specialist for dry and general applications.

The Wiha SoftFinish® zone features a solid moulded core with soft outer grip. This requires less force, yet achieves 40% more torque than conventional handles. The handle is shaped to fit comfortably in the hand, providing maximum torque forces in dry and general working conditions.

If a stuck screw has to be loosened, a precise hammer blow can be applied to the solid steel cap. Due to the hex blade extending through the handle, there is no loss of impact energy.

The solid steel cap at the end of the SoftFinish® handle enables controlled hammer blows, for example, when loosening a tight screw.

Due to the solid steel cap and hex blade extending through the handle, there is no loss of impact energy when a precise hammer blow is applied.

Thermoplastic elastomer tolerates high blades and feels soft and pleasant to the touch.

Blade with hex bolster for wrenches to use on particularly tight screws.

The right tool at a glance, thanks to the printed screw symbol on the handle end.

Wiha SoftFinish®.

• Multi-component SoftFinish® handle provides maximum user comfort
• Ergonomically perfect handle design
• Printed screw symbol on handle end for fast identification
• Available in versions with round blade, hex blade or hex blade with solid steel cap
• Blade made of high quality CVM-steel, through hardened and chrome plated
• Wiha ChromTop®-finish on tip for a perfect fit every time

For slotted screws.

302 SoftFinish® slotted cabinet screwdriver.

Round blade.

Blade: High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated. Wiha ChromTop® finish on tip for a perfect fit every time.

Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.

Application: Especially for dry and general applications.

Wiha SoftFinish®.
The specialist for dry and general applications.
Wiha SoftFinish®.

The specialist for dry and general applications.

For hex socket screws.

367 SoftFinish® ball end hex screwdriver.
Hex blade.
Blade: Chrome-vanadium steel, through hardened, chrome-plated.
Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.
Application: For setting and turning screws in difficult to access areas.

For angle and slotted screws.

200 SoftFinish® slotted nut driver.
Round blade.
Blade: Chrome-vanadium steel, through hardened, chrome-plated.
Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.
Standards: DIN 355.
Application: For nuts DIN 546.

For hex nuts.

361 SoftFinish® hex nut driver, vRound blade.
Blade: Chrome-vanadium steel, through hardened, chrome-plated.
Deep drawn socket.
Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.
Standards: DIN 3125.
Application: Especially for dry and general applications.

For hex and triangular nuts.

372 SoftFinish® hex nut driver, Round blade.
Blade: Chrome-vanadium steel, through hardened, chrome-plated.
Deep drawn socket.
Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.
Application: For working in confined spaces.

SoftFinish® MagicRing® ball end hex screwdriver.
Ring made of spring steel holds hex screws in place.
Blade: Chrome-vanadium steel, through hardened, chrome-plated.
Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.
Application: For setting and turning screws in difficult to access areas.

SoftFinish® hex screwdriver.
Hex blade.
Blade: Chrome-vanadium steel, through hardened, chrome-plated.
Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.

SoftFinish® offset hex screwdriver.
Hex blade.
Blade: Chrome-vanadium steel, through hardened, chrome-plated.
Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.
Application: Ideal for high-torque applications, e.g. in workshops.

Wiha MicroFinish.
The specialist for wet and oily applications.

Wiha MicroFinish screwdrivers stand for contemporary handle design, together with the ideal combination of materials for wet and oily applications.

The micro-fine surface of the finish zone made of sandblasted cellulose-acetate ensures maximum power transfer and provides an effective non-slip grip, even with very oily hands.

The non-slip handle is made from cellulose acetate and has a micro-fine surface structure. This gives maximum torque transmission and perfect handling in wet and oily work surroundings.

Optimum power transfer, even with very oily hands!

Wiha MicroFinish screwdrivers stand for contemporary handle design, together with the ideal combination of materials for wet and oily applications.

The micro-fine surface of the finish zone made of sandblasted cellulose-acetate ensures maximum power transfer and provides an effective non-slip grip, even with very oily hands.

The non-slip handle is made from cellulose acetate and has a micro-fine surface structure. This gives maximum torque transmission and perfect handling in wet and oily work surroundings.

The non-slip handle is made from cellulose acetate and has a micro-fine surface structure. This gives maximum torque transmission and perfect handling in wet and oily work surroundings.

Wiha MicroFinish.

- Micro-fine handle surface for a non-slip grip in an oily working environment.
- Ergonomic handle shape fits every hand.
- Blades made of high-quality chrome-vanadium-steel, through-hardened and chrome-plated for a long tool life.
- Wiha ChronTop® blade tip sits securely in the screw head and offers great dimensional accuracy.

For slotted screws.

Wiha MicroFinish slotted screwdriver.

Blade: High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated.

Handle: Non-slip Wiha MicroFinish handle with roll-off protection.

Standards: DIN ISO 8764.

Application: Best suited for turning screws in wet and oily applications.

Wiha Classic.
The robust screwdriver for multiple applications.

Day after day, the Wiha Square Grip screwdriver proves to be a universal classic for a wide variety of different applications. Its robust handle is manufactured from high quality plastic and is impact resistant, non-splintering and recyclable.

Users appreciate its versatility and high quality, which is also conveyed by the hardened chrome-vanadium-molybdenum steel blade.

Wiha Square handle, impact-resistant and rust-proof – also withstands a few hammer strokes.

Wiha Square – the tough and versatile classic.

The slim square handle even fits into the smallest pocket.

For slotted screws.

186 Classic slotted screwdrivers. Round blade.
Blade: Chrome-vanadium steel, through hardened, nickel-plated.
Tip and blade width identical up to size 6.5.
Handle: Impact resistant Wiha Classic handle, resistant to chemicals and oils.
Application: For universal use in trade and industry.
Extra: Series includes extra long dimensions for screws that are difficult to access.

Wiha Info  
Reamers and awls are also available with wood handles, see page 33.
Wiha wooden handle.
The all-rounder for woodworking applications.

The Wiha wooden handle is made of untreated, sealed beechwood. Its hex bolster and specially developed handle profile underlines its professional claim. This is expressed through the blade that extends to the end of the handle. This enables the user to loosen tightened screws with a hammer stroke. From size 5.5, blade extends through handle. Anti-cam-out ribs, hex bolster.

Handle: Wiha wooden handle made of sealed beech wood, handle end protected with high-quality leather cap.
Standards: DIN ISO 8764.
Application: For all applications in woodworking and furniture industries, including all woodworking applications.

For slotted, Phillips and Pozidriv screws.

162 Wooden slotted screwdriver. Round blade with hex bolster.
Blade: Chrome-vanadium steel, through hardened, nickel-plated.
Handle: Wiha wooden handle made of sealed beech wood, handle end protected with high-quality leather cap.
Standards: DIN ISO 8764.
Application: For all applications in woodworking and furniture industries.

Wiha PicoFinish.
The comfortable precision screwdriver.

The PicoFinish is distinguished by top-quality materials and an ergonomic handle design. The comfortable precision screwdriver with multi-component handle, rapid rotating zone and easy-movement rotating cap is a professional tool for all precision work for confined screw applications. To make things even easier for the user working with tiny screws, we’ve developed a second, smaller handle. The colour-coded marking of the drive symbol on the rotating cap is also new. This makes it easier to recognise the individual screwdrivers when several are being used at once.

The blades are made of top-quality chrome-vanadium-molybdenum steel to ensure a particularly long tool life. They are subsequently through-hardened in a controlled process and chrome-plated. The precise ChromTop® tip ensures a secure hold in the screw head.

Wiha PicoFinish.
- Ergonomic handle design with soft zone for comfortable work
- Easy-movement rotating cap for rapid hand action
- Colour-coded marking of the drive symbol for easy identification
- Through-hardened, chrome-plated blade made of chrome-vanadium-molybdenum steel for a long tool life
- Wiha ChromTop® tip guarantees a secure hold in the screw head
- Ideal for all fine, filigree applications in electronics and precision-mechanics applications, as well as for DIY and model-building

The easy-movement rotating cap protects the palm of the hand.

Colour-coded drive symbols on the rotating cap for easy recognition of the individual screwdrivers.

For slotted screws.

260P PicoFinish slotted screwdriver.
- Handle with rotating cap and rapid-turning zone.
- Blade: High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated. Wiha ChromTop® finish on tip for a perfect fit every time.
- Handle: Wiha PicoFinish handle for rapid rotation.
- Application: Ideal for high-precision work with electro-technical and precision components.

Wiha universal scraper.
Easily removes sealing, paint and glue.

- The Wiha universal scraper is the optimal tool to quickly and easily remove seals, paint, glue and labels from glass and metallic surfaces.
- The universal scraper is a robust tool with an ergonomic SoftFinish® multi-component handle. Due to the special handle shape, ultimate user comfort is provided. The high quality blades have a very long life. If a blade change is necessary, it can be done quickly and easily using the unique blade changing device.

Wiha universal scraper.
- Removes quickly seals, paint, glue and labels
- High-quality blades have a very long life
- Square blade geometry, ideal for corners and edges
- Unique blade changing device ensures easy blade change
- Ergonomically shaped SoftFinish® multi-component handle for maximum user comfort

The Wiha universal scraper is a tool which should be present in every professional toolbox. It also makes life easier for every home worker.

The Wiha universal scraper can be used for the easy removal of gasket remains.

Wiha SoftFinish® electric slimFix.

The safe and comfortable insulated VDE screwdriver.

Applications on live equipment are subject to very special requirements. The focus is on absolute user safety and Wiha demonstrates this with a wealth of details.

The high quality blade insulation is moulded directly onto the blade and therefore guarantees safety when working on live equipment up to 1500 V DC or 1000 V AC. To maintain this safety, each screwdriver of the SoftFinish® electric series is individually tested in a water bath at 10000 Volts according to IEC 60900:2004. The roll-off protection and the special handle geometry offer optimum handling and electrical safety, even in critical applications.

The right tool at a glance, thanks to the printed screw symbol on the handle end.

For slotted, Phillips and Pozidriv screws.

3201 SoftFinish® electric slimFix slotted screwdriver.
- Individually tested protective insulation 1,000 V AC, VDE and GS tested.
- Blade: High quality chrome-vanadium-molybdenum steel, through hardened, black-finish. Protective insulation moulded directly onto the blade and completely integrated into the blade in the lower area.
- Application: For use on or around electrical components up to 1000 V AC.
- Extra: The integrated protective insulation enables low-lying fastening and spring elements to be reached and manipulated.

For internal square drive and terminal screws.

3211 SoftFinish® electric slimFix Phillips screwdriver.
- Individually tested protective insulation 1,000 V AC, VDE and GS tested.
- Extra: The integrated protective insulation enables low-lying fastening and spring elements to be reached and manipulated.

Order-No. PZ1 35393 PH1 35394 PH2

3241 SoftFinish® electric slimFix Pozidriv screwdriver.
- Individually tested protective insulation 1,000 V AC, VDE and GS tested.
- Extra: The integrated protective insulation enables low-lying fastening and spring elements to be reached and manipulated.

Order-No. PZ2 35395 PZ1 35396 PH2

Wiha SoftFinish® electric slimVario.

Maximum safety at minimum size.

The perfect combination of functional applications. It can be used both as a mechanical and electrical fastening tool. The bit holder manufactured from metal parts gives the tool a long service life and an unusual level of ruggedness for everyday use. Added to that is an assortment of commonly used exchange bits and the pleasant SoftFinish® handle.

SoftFinish® electric slimVario.

- Slim – light – mobile ideal for taking along
- Durable Wear-free bit holder due to manufacturing with metal parts
- Gets everywhere Even in small apertures and low-lying fastening and spring elements
- A firm hold Optimal interplay of bit and holder
- Certified quality GS mark for inspected safety, one-off testing in a water bath at 10,000 V according to IEC 60900:2004

Attention: 6 mm slimBits only to be used in the slimVario bit holder and slimTorque (VDE bit holder VDE torque system).

Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.

### Blade:

High quality chrome-vanadium-molybdenum steel, through hardened, black-finish. Insulation moulded directly onto blade. Deep drawn socket.

### Insulation:

Individually tested protective insulation 1,000 V AC, black-finish. Insulation moulded directly onto blade. Deep drawn socket.

### VDE and GS tested.

Individually tested protective insulation 1,000 V AC, black-finish. Insulation moulded directly onto blade. Deep drawn socket.

### Application:

For all work on or around electrical components up to 1000 V AC.

### Standards:

The Wiha SoftFinish® electric Xeno screwdriver is a special VDE screwdriver used to turn terminal screws. Terminal screws are typically used in switch-cabinet systems and fuse boxes, terminal blocks and relays. They have a special combination profile and are available as slotted/Phillips or slotted/Pozidriv models.

When working with VDE tools, observe the national safety and accident prevention regulations.

The Wiha SoftFinish® electric Xeno is ideally suited for work on switch cabinet systems, fuse boxes, terminal strips and relays.

For terminal screws (slotted/Phillips).

SB327 S2 SoftFinish® electric Xeno screwdriver set, 2 pcs.
Individually tested protective insulation 1,000 V AC, VDE and GS tested. Individually packed.
Blade: High quality chrome-vanadium-molybdenum steel, through hardened, black-finish. Insulation moulded directly onto blade.
Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.
Application: For use on or around electrical components up to 1,000 V AC.
No slipping and better torque transfer with terminal screws e.g. in switch-cabinets, fuse boxes and terminal blocks.

SB328 S2 SoftFinish® electric Xeno screwdriver set, 2 pcs.
Individually tested protective insulation 1,000 V AC, VDE and GS tested. Blister packed.
Blade: High quality chrome-vanadium-molybdenum steel, through hardened, black-finish. Protective insulation moulded directly onto the blade and completely integrated into the blade in the lower area.
Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.
Application: For use on or around electrical components up to 1,000 V AC.
Extra: The integrated protective insulation enables low-lying fastening and spring elements to be reached and manipulated. Blister packed.

Wiha single-pole voltage tester. 110-250 Volts in blister pack.

Order-No. 35378 0 60 140 19 6

Wiha SoftFinish® as single-pole voltage tester.
• High quality, hardened chrome-vanadium molybdenum blade for perfect fastening
• Quality screwdriver in Wiha SoftFinish® design with testing function
• Voltage testing function with respect to earth potential from 100 to 250 V worldwide use possible
• Tough spring clip of non-rusting stainless steel
• Solid brass earthing contact
• VDE and GS tested

325-11

Blade: High-quality chrome-vanadium molybdenum steel, through-hardened, nickel-coated.
Insulation moulded directly onto blade.
Handle: Ergonomic Wiha SoftFinish® handle of transparent, impact resistant plastic. Metal contact plate and robust clip.
Application: For determining alternating voltages in low voltage range up to 250 volts with respect to earth potential.
Suitable for trade and industry professionals.

Order-No. 34745 0 60 140 19 6

Wiha SoftFinish® ESD.

For use on electrostatically sensitive components.

The SoftFinish® ESD screwdrivers feature an impression and ergonomic multi-component handle.

For work on electrostatically sensitive devices and assemblies, there is no better screwdriver than the Wiha SoftFinish® ESD, with integrated soft zone in the multi-component handle. The dissipative handle with a surface resistance of 10⁶ - 10⁹ ohms discharges the electrostatic energy in a controlled manner to protect devices at risk from electrostatic discharge.

The ergonomic handle form was developed from the basis of extensive scientific investigations in cooperation with the Fraunhofer Institute. The result is a multi-component handle with a seamless outer form. Each hand size adapts the component handle with a seamless outer form. Each hand size adapts

Wiha SoftFinish® ESD.

For use on electrostatically sensitive components.

Sets.

Wiha Precision ESD.

The static dissipative precision screwdriver.

For TORX® screws.

Wiha SoftFinish® ESD TORX® screwdriver:
- Dissipative handle, ESD-safe.
- Blade: High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated.
- Wiha ChronTop® finish on tip for a perfect fit every time.
- Wiha ChronTop® finish on tip for a perfect fit every time.
- Wiha ChronTop® finish on tip for a perfect fit every time.
- Wiha ChromTop® multi-component handle with roll-off protection. Surface resistance 10⁶ - 10⁹ ohms.
- Standards: IEC 61340-5-1.
- Application: For working on electrostatically sensitive components.

Wiha Precision ESD:
- The rotating cap with contact area makes incremental adjustment quick and easy.
- The dissipative Precision ESD - for working on electrostatically sensitive components.
- Safety Notice: Wiha ESD screwdrivers are noninsulated, therefore not suitable for working on live parts.

Electrostatic discharges are a major problem, since even low voltages can damage sensitive components. Various factors have to be considered in order to understand the problem. In ESD protection areas, the electrostatic charge is safely conducted to earth. Users have to wear the appropriate ESD footwear or grounded wrist strap. The tools used also have to be electrostatically protected.

The ESD screwdrivers from Wiha conform to the international ESD Standards IEC 61340-5-1. Due to the electrical surface resistance, 10⁶ - 10⁹ Ohm, defined electrostatic discharge is guaranteed.

The rotating cap with contact area makes incremental adjustment quick and easy.

Thanks to the rotating cap, incremental adjusting is easy.

The dissipative Precision ESD - for working on electrostatically sensitive components.

Safety Notice: Wiha ESD screwdrivers are noninsulated, therefore not suitable for working on live parts.
Wiha Precision ESD.

The static dissipative precision screwdriver.

222 Precision ESD slotted screwdriver.
Dissipative handle, ESD-safe.
Blade: High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated.
Wiha ChromTop® finish on tip for a perfect fit every time.
Handle: Precision handle with rotating cap, surface resistance 10³ - 10⁹ ohms.
Standards: IEC 61340-5-1.
Application: For working on electrostatically sensitive components.

# Wiha Precision ESD.

The static dissipative precision screwdriver.

## ESD screwdriver sets.

- **272 K6**
  - **Order-No.** 08463
  - **Series** 272 K6
  - **Blade:** High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated.
  - **Handle:** Wiha Proturn® Precision handle with rotating cap.
  - **Standards:** IEC 61340-5-1.
  - **Application:** For working on electrostatically sensitive components.
  - **Extra:** Practical plastic rack with hanging holes.

## ESD screwdriver sets.

- **277 K6**
  - **Order-No.** 32379
  - **Series** 277 K6
  - **Blade:** High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated.
  - **Handle:** Wiha Proturn® Precision handle with rotating cap.
  - **Standards:** IEC 61340-5-1.
  - **Application:** For working on electrostatically sensitive components.
  - **Extra:** Practical plastic rack with hanging holes.

---

# Wiha Ceramic.

The non-static adjustment tool for clean rooms.

## Ceramic screwdriver set.

- **270 HK3**
  - **Order-No.** 02163
  - **Series** 270 HK3
  - **Blade:** Made of high-quality special ceramic, anti-static/anti-magnetic.
  - **Handle:** Wiha Proturn® Precision handle with rotating cap, anti-static.
  - **Application:** Suitable for adjusting non-static systems, capacitors, solenoids and various components, such as capacitors, solenoids and various resistances.

## Ceramic screwdriver set.

- **271**
  - **Order-No.** 02168
  - **Series** 271
  - **Blade:** Made of high-quality special ceramic, anti-static/anti-magnetic.
  - **Handle:** Wiha Proturn® Precision handle with rotating cap, anti-static.
  - **Application:** Ideal for adjusting electrical components, anti-static and anti-magnetic handle and blade.
  - **Extra:** Suitable for working in clean rooms.
  - **Extra:** Resistant to mechanical wear, thermal shock stress and acid corrosion.

---

Wiha Ceramic.

- Ideal for adjusting electrical components.
- Suitable for working in clean rooms.
- Anti-static and anti-magnetic handle and blade.
- Rotating cap for easy working.
- Resistant to mechanical wear, thermal shock stress and acid corrosion.

For slotted and Phillips screws.

- **270 HK3**
  - **Order-No.** 02163
  - **Series** 270 HK3
  - **Blade:** Made of high-quality special ceramic, anti-static/anti-magnetic.
  - **Handle:** Wiha Proturn® Precision handle with rotating cap, anti-static.
  - **Application:** Suitable for adjusting non-static systems, capacitors, solenoids and various components, such as capacitors, solenoids and various resistances.
